STANDARDIZED DATA PAGES
FOR RECIPROCATING ENGINES

Standardized data pages are used to present the specifications of the basic aircraft engines and airborne auxiliary units described and illustrated in the following section of the book. The arrangement of the data on the standardized data pages is as follows:

First, there is a concise description of the engine, its construction and the major accessories with which it is equipped. Then, in tabular form, there are items such as bore, stroke, displacement (swept volume), compression ratio, overall dimensions, frontal area, total weight and weight per maximum horsepower.

Fuel and lubricating oil consumptions at cruising output are given in units of weight. The fuel grade and the viscosity of the lubricating oil at 210° F. (100° C) also are specified.

Efficiency figures such as maximum power output per unit of displacement, maximum power output per unit of piston area, maximum piston speed and maximum brake mean effective pressure have been calculated for comparative purposes.

Finally, the various horsepower ratings of the engine are given, such as:

Take-off rating, or the maximum horsepower which it is permissible to use at sea level and at low altitudes.
Military (combat) rating, or the maximum horsepower which it is permissible to use for military purposes at various altitudes.
Normal rating, or the maximum horsepower which the engine can deliver continuously for climb without undue stress.
Cruising rating, or the maximum horsepower recommended for continuous operation consistent with reasonable fuel economy.
Emergency rating, or the maximum horsepower which it is permissible to use for a short period of time in an emergency.

Stand-by ratings, or the maximum horsepower which it is permissible to use continuously when one or more engines are out of operation, are given where available.

Ratings obtained with alcohol-water injection or methanol-water injection—commonly known as water injection—are indicated by the letters A.D.I. (Anti-Detonant Injection).

The status of the data on the standardized pages can be seen from the notation at the top of each page adjacent to the country of origin. New denotes completely new data. Revised indicates major revisions. Unmarked pages have only minor changes.
### Rolls-Royce Griffon (1-stage)

**Model**
- Griffon IV.

**Type**
- 12 cylinders, vee 60 degrees, pressure water cooled, geared drive, supercharged, 4-cycle.

**Construction**
- 2-piece aluminum alloy crankcase, 2 aluminum alloy cylinder blocks with a detachable head for each block. Steel cylinder liners. 2 inlet valves and 2 exhaust valves (sodium cooled) per cylinder actuated by overhead camshaft. 6-throw 1-piece counterbalanced crankshaft supported in 7 plain bearings. Spur reduction gear, ratio 0.45:1. Rotor remote drive gear box for accessories.

**Supercharger**

**Carburation**
- 1 S.U. AVT-44/203 2-barrel updraft carburetor with automatic mixture control and progressive boost control.

**Ignition**
- 1 B.T.H. CSH12-125/4 dual magneto. 2 14-mm short reach spark plugs per cylinder. Shielded ignition system.

**Lubrication**
- Pressure feed, 45-60 lb./sq.in. (3.2-4.2 kg/cm²). Direct feed to all crankshaft main bearings. Dry sump.

**Starter**
- Plessy Coffman cartridge starter, or approved electric starter.

**Griffon II:** Similar to Griffon IV.

**Note:** The Rolls-Royce Griffon has the same displacement as the Rolls-Royce R racing engine which won the Schneider Trophy outright in 1931. The R engine was rated at 2,600 h.p./2,000 r.p.m./sea level at 670 in. (1,702 mm) Hg. boost with a b.m.e.p. of 310 lb./sq.in. (21.8 kg/cm²), using 92-octane gasoline.
Rolls-Royce Griffon (2-stage)

Model: Griffon 65.

Type: 12 cylinders, vee 60 degrees, pressure water cooled, geared drive, supercharged, 4-cycle.

Construction: 2-piece aluminum alloy crankcase, 2 aluminum alloy cylinder blocks with a detachable head for each block. Steel cylinder liners, 2 inlet valves and 2 exhaust valves (sodium cooled) per cylinder actuated by overhead camshaft. 6-throw 1-piece counterbalanced crankshaft supported in 7 plain bearings. Spur reduction gear, ratio 0.45:1 or 0.51:1. Rotol remote drive gear box for accessories. Equipped for Rotol 5-blade constant speed variable pitch propeller.

Carburation: 1 S.U. AVT-140 2-barrel updraft carburetor with automatic mixture control and progressive boost control.

Ignition: 1 B.T.H. CSH12/12S/4 dual magneto, 2 14-mm short reach spark plugs per cylinder. Shielded ignition system.

Lubrication: Pressure feed, 45-60 lb./sq.in. (3.2-4.2 kg/cm²). Direct feed to all crankshaft main bearings. Dry sump.

Starter: Plessy Coffman L3/1HT cartridge starter, or approved electric starter.

Rolls-Royce Griffon (1-stage 2-speed)

Model: Griffon VI (RG 14 SM)

Type: 12 cylinders, vee 60 degrees, pressure liquid cooled, geared drive, supercharged, 4-cycle.

Construction: 2-piece aluminum alloy crankcase, 2 aluminum alloy cylinder blocks with a detachable head for each block. Steel cylinder liners, 2 inlet valves and 2 exhaust valves (sodium cooled) per cylinder actuated by overhead camshaft, 6-throw 1-piece counterbalanced crankshaft supported in 7 plain bearings. Spur reduction gear, ratio 0.51:1. Provision for Rotol remote drive accessory gear box.

Carburetion: 1 S.U. AVT-14/203 2-barel updraft injection type carburetor with automatic mixture control and progressive boost control.

Ignition: 1 B.T.H. CSH12-125/4 dual magneto, 2 14-mm short reach spark plugs per cylinder. Shielded ignition system.

Lubrication: Pressure feed, 45-60 lb./sq.in. (3.4-4.2 kg/cm²). Main bearings lubricated by crankshaft end-to-end system. Dry sump.

Starter: Plessey Coffman L-3-1 cartridge starter.

Griffon II, III, IV (RG 2 SM): Similar to Griffon VI, but with supercharger ratios 7.65:1 and 10.68:1. Reduction gear ratio 0.451:1.

Griffon V (RG 14 SM): Similar to Griffon VI, but with gear ratio 0.451:1.

Griffon VII (RG 14 SM): Same as Griffon VI.

Griffon VIII (RG 14 SM): Same as Griffon VI. Fuel injection pump.
Rolls-Royce Griffon (2-stage 2-speed)

Model: Griffon 69 (RG 4 SM).

Type: 12 cylinders, vee 60 degrees, pressure liquid cooled, geared drive, supercharged, 4-cycle.

Construction: 2-piece aluminum alloy crankcase, 2 aluminum alloy cylinder blocks with a detachable head for each block. Steel cylinder liners. 2 inlet valves and 2 exhaust valves (sodium cooled) per cylinder actuated by overhead camshaft. 6-throw 1-piece counterbalanced crankshaft supported in 7 plain bearings. Spur reduction gear, ratio 0.451:1. Provision for Rotol constant speed propeller, and Rotol remote drive accessory gear box.

Carburation: 1 Rolls-Royce Bendix-Stromberg 9T-401 3-barrel updraft injection type carburetor, with injection through 8 nozzles into eye of first-stage supercharger impeller. Automatic mixture control and progressive boost control.

Ignition: 1 B.T.H. CSH12/12S/4 dual magneto, 2 14-mm short reach spark plugs per cylinder. Shielded ignition system.

Lubrication: Pressure feed, 45-60 lb./sq.in. (3.2-4.2 kg/cm²). Main bearings lubricated by crankshaft end-to-end system. Dry sump.

Starter: Plessey Coffman L5 cartridge starter.

**Rolls-Royce Griffon (2-stage 2-speed)**

**Model**
Griffon 88.

**Type**
12 cylinders, vee 60 degrees, pressure liquid cooled, geared drive, supercharged, 4-cycle.

**Construction**
2-piece aluminum alloy crankcase, 2 aluminum alloy cylinder blocks with a detachable head for each block. Steel cylinder liners, 2 inlet valves and 2 exhaust valves (sodium cooled) per cylinder actuated by overhead camshaft. 6-throw 1-piece counterbalanced crankshaft supported in 7 plain bearings. Spur reduction gear, ratio 0.4425. 2 co-axial contra-rotating propeller shafts.

**Supercharger**
Gear-driven 2-stage 2-speed supercharger, ratios 5.84:1 and 7.58:1. Automatic gear change. Liquid-cooled intercooler.

**Fuel system**
1 Rolls-Royce Mk. IIC combined fuel injection and transfer pump, with injection through 1 nozzle into updraft air intake. Automatic boost control.

**Ignition**
1 B.T.H. CSH12.12S/4 dual magneto. 2 14-mm short reach spark plugs per cylinder. Shielded ignition system.

**Lubrication**
Pressure feed, 45-60 lb./sq.in. (3.2 - 4.2 kg/cm²). Main bearings lubricated by crankshaft end-to-end system. Dry sump.

**Starter**
Plessey Coffman 15 cartridge starter.
